**Subject:** SFIREG Joint Working Committee Meeting Agenda

Good afternoon,

Jeff (POM chair) and I (EQI chair) are currently putting together the agenda for the JWC meeting to be held virtually Sept. 21-23. The meeting was planned to be hosted in-person in California, and while we switched to a virtual platform it will still be hosted by California EQI and POM members. In the past we have had sessions in-person where the meeting would be held with just applicable EPA and state people. We would like to do this in a virtual environment. On September 23<sup>rd</sup>, we will adjourn the JWC meeting at 3pm. At 3:30, we would provide a separate Go-To-Meeting room with a separate invite sent to applicable EPA staff and SLA representatives so we could have a conversation without a public presence. This may be a 1 to 2 hour meeting depending on content. Below are topics suggested from both committees that we would like to consider as part of this "closed door" session. Would this be feasible? And if so, can all of the topics below be discussed, or a portion of them?

1. 2021 Dicamba registrations for OTT uses in cotton and soybeans
2. GMO dicamba resistant cotton and soybean seed registrations
3. Dicamba survey and responses (if any)

# Not Part of Admin Record
